

End Equipment Loss with Real-Time Location System Plus (RTLS+)

Misplaced and under-utilized healthcare equipment account for an annual cost of **\$765 billion**. Reducing this cost is critical to quality patient care.

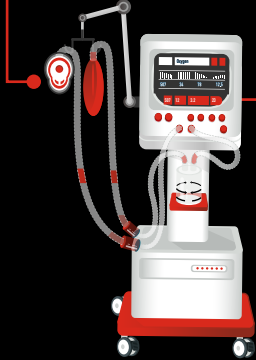

\$11 Million in hospital equipment went missing from a single U.S. hospital in 2015 alone.
Protect your hospital and reduce the cost of new equipment through RTLS+ loss prevention.

\$300k - \$400k is spent annually by every hospital to replace missing high-priced items like ventilators and electrocardiograms.
RTLS+ helps hospitals purchase equipment based on strategic decisions instead of lost equipment.

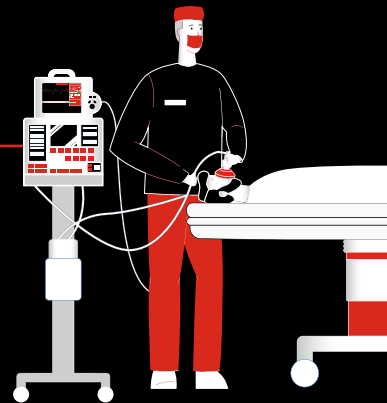

More than **\$50,000** worth of stolen hospital equipment surfaced on eBay in one day.
Prove that equipment was moved and receive alerts using RTLS+ AI & ML video analytics and beacon solutions.

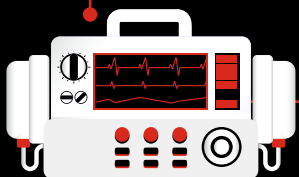

85% of nurses spend **60 minutes** or more per shift searching for equipment. That can equate to **72,000 hours** per year in lost productivity at a 300-bed hospital.

RTLS+ decreases the amount of time nurses spend looking for equipment during a shift, improving the quality of patient care and staff workflows.

60% of hospital equipment always sits idle.

Allocate funds based on real asset utilization instead of excess inventory, using RTLS+.

Reduce equipment loss and theft down to **0%** with RTLS+.

RTLS+ delivers the tools to easily track and manage inventory, so staff can focus on what matters: their patients.

Invest in a solution your staff and patients can depend on.
